

**2020-2021 Springdale Acadience Summary
of Students Below, Approaching, and Proficient in Reading
by Grade Level**

Grade	Total	Huge Growth 2021		Below		Approaching		Proficient	
		#	%	#	%	#	%	On &	Above
								#	%
K	11	11	100%					11	100%
1	2	1	50%			1	50%	1	50%
2	7	3	43%					7	100%
3	8	5	63%	2	25%			6	75%
4	8	5	63%					8	100%
5	9	3	33%	1	11%			8	89%
	45	28	62%	3	7%	1	2%	41	91%

Analysis of Data:

- Acadience scores for **End of the Year** show that 91% of the students read On and Above Grade Level.
- Of our six SpEd students, three are still RED. However, two of them progressed almost 1.5 years of growth. Only one who is RED did not progress as much as we would have liked. The other three SpEd students made over 1.5 years of growth going from YELLOW to GREEN.
- 62% of students made a year's growth or more. Five of them made over 2 years of growth; one moving from RED to BLUE. In Kindergarten, two students went from RED to BLUE and three students went from YELLOW to BLUE.
- Seven students (16%) did not make a year's growth because their above grade level scores were so high making it is nearly impossible to go higher.
- One student moved from RED to YELLOW, which is a great accomplishment. However, three students fell from BLUE to GREEN.

In summary, only one student did not make at least one year of growth. He is young and from a family where only Spanish is spoken in the home. Over time, he should eventually make progress. Because another student who has been RED for the last four years turned BLUE growing 279 points in one year. You just do not give up on a child.
