Glen led us in discussion of the 24-25 School Improvement Plan as he showed, in a handout, the school achievements in Reading and Math. Listing our school goals as 5% growth throughout the school year, hiring a counselor, participating in Leader in Me and teacher professional development. These goals have been and are being met. Goals for 2025-26 are to retain a school counselor, Kristen has proved an asset in our school. Also adding more emphasis on math skills next school year.

Our school budget was discussed, Glen explained that next year's budget is based on the amount of students this year. So next year some of our budget will be less.

We discussed the possibility of having a bus stop in Hurricane for students coming up here, which might be a draw for more people from Hurricane Valley to send students here. Glen said he would ask about this.
